

Temporary Works Supervisor Training

Why TWS?

TWS is a key role for the safety and overall productivity of a site. Any TWC will require one or more skilled, knowledgeable and willing supervisors. The role will allow for increased practical site knowledge and is an intermediate step in order to develop the necessary competency to complete the role of TWC.

This training will contribute towards projects being completed to cost, quality, time and safety standards.

Aims and objectives

The aim of the course is to provide participants with the knowledge and skills to undertake the responsibilities of an appointed Temporary Works Supervisor, in line with the requirements of BS5975.

By the end of the course, participants should be able to:

- Understand the roles and responsibilities of those involved in Temporary Works.
- Describe the impact of Temporary Works throughout the development of the project.
- Know the procedures in place to gain advice on the management of Temporary Works.

The course will also provide an opportunity to identify and share examples of best practice within the company. To identify procedural changes required for the future and to implement further training requests.

Who should attend this course

- Specialist contractors and site team
- Project management
- Planners
- Estimators
- Anyone who may be required to be a TWS

A note for specialist contractors:

Many specialist contractors find that having staff that are trained and competent in the role of TWS increases the standard of their work. Also it provides you with added competence to prove at tender stage, which will allow you to work more successfully alongside larger more ambitious contractors.

TWS course outline

Introduction

- Statement of intent
- Objectives and overview
- Delegate introduction

British Standard for Temporary Works
